

Abhishek Jaiswal

📍 Barcelona, Spain (from Nov 2026) | ✉️ ajaiswal9043@gmail.com | ☎️ +91-9958045472 | 🌐 [in/abhijaiswal18](https://www.linkedin.com/in/abhijaiswal18)

PROFILE

Senior Software Engineer with 5 years of experience building backend services, distributed systems, and core networking features, now focused on AI/agent systems and RAG. Adept at leading initiatives, mentoring juniors, and shipping production-grade software. Eligible for Spain's Highly Qualified Professional permit.

EDUCATION

B.Tech • CSE

Indian Institute of Technology
Guwahati
2017 – 2021

SKILLS

Languages

◇ Python ◇ TypeScript ◇ C ◇ C++ ◇ Java

Cloud

◇ AWS (EC2, S3, SQS) ◇ GKE ◇ Terraform

Infrastructure

◇ Docker ◇ Kubernetes ◇ KEDA

AI & LLM

◇ AI Agent Dev ◇ RAG ◇ Prompt Engineering
◇ LangChain ◇ Multi-Agent Orchestration

Frameworks

◇ FastAPI ◇ Flask ◇ Node.js ◇ Express.js
◇ Spring ◇ React ◇ tRPC

DB

◇ PostgreSQL ◇ MySQL ◇ Redis ◇ ChromaDB
◇ MongoDB

Methods

◇ CI/CD ◇ Agile ◇ Unit Testing ◇ Microservices

Miscellaneous

◇ Elasticsearch ◇ Fluent-bit ◇ SD-WAN ◇ TCP/IP
◇ REST ◇ Network Security

LANGUAGES

◇ English (C2) ◇ Spanish (A1)

PROJECTS

Document Podcast

May 2026 – Jun 2026

- Turned scientific documents into natural **two-speaker podcasts** in English and Danish (Python, **FastAPI**, **OpenAI**, **Cartesia TTS**).
- Kept long-form dialogue consistent via staged script generation, repetition checks, and voice continuity across audio chunks.

CERTIFICATIONS

Retrieval Augmented Generation (RAG)

April 2026 – Present

Claude Code: An Agentic Coding Assistant

May 2026

AWS Storage

June 2025

EXPERIENCE

AI Engineer (Contract)

Sep 2026 – Present

Novo Nordisk

Remote

- Building a **research-agent** chat platform for medical and internal market research, saving verified files to **SharePoint**.
- Built a dynamic document index on **Qdrant** with metadata filtering and **hybrid retrieval**, powering an insights dashboard.
- Shipped a dashboard chatbot combining **live web search** with the internal index, answering each query in **under 30 seconds** with verified links or internal document paths.

Founder & Solo Engineer

Jul 2026 – Sep 2026

Bellance OS (Salon Intelligence Platform)

Remote

- Built a multi-tenant salon intelligence platform solo: **TypeScript** monorepo (tRPC API, WhatsApp rail, POS, **React** PWA) over a two-store **PostgreSQL** architecture, shipped to a pilot outlet with **~2,100 CI-gated tests**.
- Designed a per-outlet **service-relationship graph** that learns co-purchase and adoption patterns from billing history, surfacing only pairings with **proven lift** as owner-approved recommendations.
- Tracked each recommendation's revenue impact in an **append-only ledger**; quantified **INR 330K+** recoverable leakage from 4 months of real salon data.
- Engineered a **multi-agent AI workflow** (architect, adversarial challenger, security auditor) to build and audit the codebase.

Founding Engineer

Nov 2025 – Jan 2026

Knowl

Bengaluru, India

- Designed Python/FastAPI backend services handling **1M+ API requests/day**, deployed on AWS EC2 and GKE (hybrid cloud).
- Built an AI agent inferring users' preferred language from names via LLM reasoning and multi-strategy fallbacks, **improving prediction accuracy by 45%**.
- Implemented Redis-based rate limiting and throttling for high-volume APIs ensuring stability under P95 loads.

Member of Technical Staff 2

Jul 2021 – Oct 2025

VMware - Arista (Velocloud SD-WAN)

Bengaluru, India

- Built a network interface tracking system giving real-time statistics for **200K+ edge devices** via kernel data extraction and dashboards.
- Delivered Advanced Threat Protection (ATP) with IDS/IPS, threat intelligence, and URL filtering, mitigating **10K+ monthly malicious connection attempts**.
- Designed and implemented IPv6 DHCP Prefix Delegation for dynamic prefix allocation across large SD-WAN deployments with zero-NAT global addressing.
- Led introduction of a unit testing framework for legacy C code, scaling coverage from **5% to 90%** and enabling full CI automation.
- Built a packet processing latency visualisation platform, improving performance analysis and debugging workflows.
